In the AutoCADMarkup tool, use the Markup Import feature to import the text from a PDF or printed document into the current drawing to create a visual and textual change. Instead of tediously typing in text, you can import text and comments directly into the drawing. You can also use Markup Assist to create, import, and merge comments and text into drawings. This new way to import and share information for designers is powerful, fast, and will make your job easier. Improved dimension creation and editing: AutoCAD now has powerful dimension creation and editing tools. You can quickly and easily make horizontal and vertical dimension lines, such as wall, ceiling, and floor lines, from precise snap points. By using the Snap to Grid option, you can place dimension lines where they meet. Use the dimension lines to create dimension text, provide guidance for the Drafting Optimization feature, and set snap points for the profile feature. Use the Align To option to quickly align dimension lines to specific guides or snap points. Smooth Grids: Add the Smooth Grids option to the Drafting Properties dialog box, and choose the desired number of Smooth Grids. The same option is available in the Draw/Edit/Options/Drafting/Bounding box toolbar. Added geometry snap options for edging, contouring, and vertical and horizontal edges. The geometry snap options enable you to quickly add and edit the shape of an edge. Added a Filled Surface feature that enables you to quickly create 3D-like, hollow surfaces. With this feature, you can quickly create the shell of a box, cylindrical wall, or other hollow shapes. Use the new object snap option to align objects with a specific line or point. Sketch Features: The Sketch feature enables you to quickly add sketches to the drawing. Using the Sketch tool, you can add one, multiple, or aligned sketches with a variety of shapes, hatch patterns, and symbol definitions. You can now also select multiple sketches in a drawing and easily align them. You can add many drawings, symbols, and hatch patterns to a Sketch.
