## RSS Popper Free PC/Windows

The RSS Popper is a news aggregator add-in for Outlook and Outlook Express. It provides RSS and RDF news aggregation by delivering e-mailed newsletters to your Outlook RSS folders. It supports OPML import/export. You can use it to collect news items, blogs, podcasts, RSS news, RSS feeds and all other kinds of RSS content. You can change the format of the e-mailed news items: you can ask for full HTML versions, or only the summary. (For example, I set the e-mail message of full HTML version to come only for important items and only once a week). There is also a filter option which allows you to group news items by topic, filter by names of people, etc. You can add RSS feeds using the RSS toolbar in your Outlook. RSS Popper includes a compact toolbar for fast switching between RSS news lists and content. It allows you to search news feeds and have the results presented to you in a list. You can open the news items, and save them to your favorites. You can also follow topics, people, news items and get an e-mail when new items are added to a topic. RSS Popper supports podcasts, blogs and RSS news. You can select a podcast from the podcast list or search for it. RSS Popper allows you to download podcasts to your computer. The downloaded podcasts are stored in RSS Popper's internal folder. RSS Popper also provides an OPML import/export functionality. This functionality means that you can import OPML files containing information about podcast feeds, blogs or RSS news feeds and have them displayed in the list of news items. You can export any news item to a OPML file. RSS Popper allows you to select or search blogs. All of the blogs (with a link) are placed into the list of news items. The blog addresses appear in bold in the RSS news lists. You can open a news item and view the blog's page. You can also subscribe to blogs via RSS. You can search for RSS news feeds in RSS Popper. RSS Popper allows you to view RSS news feed in a list. You can open any RSS news feed and view the news item's page. You can subscribe to RSS feeds. VLC is a free multimedia player for Windows, Linux, and OS X. It can play most multimedia files as well as DVDs and Audio CDs. VLC supports many audio and video codecs, including Windows Media Audio.

### What's New in the RSS Popper?

RSS Popper is a free add-in for Outlook, Microsoft Outlook Express and any other client that allows to synchronize RSS/RDF/Atom feeds in the Outlook RSS folders. This add-in also allows to read all news items in the RSS folders in any client without the need to run any third-party RSS reading tools. 4. Install RSS Popper 1. Download RSS Popper here: 2. Save it as an executable file to your computer. 3. Double click the executable to install. 4. If you're using Outlook, it will run as an add-in to Outlook. If you're using Outlook Express, it will run as an add-in to Outlook Express. 5. When you first start Outlook, Outlook will check if RSS Popper is available and will start to synchronize RSS feeds from your favorite RSS reader to your RSS folder in Outlook. When you've finished to synchronize all your RSS feeds, you can stop the add-in. \* \* \* NOTES RSS Popper synchronizes your RSS feeds to Outlook/Outlook Express and allows you to read RSS feeds offline using the offline view feature. \* \* \* 5. RSS Popper 1. In the upper right corner, click RSS Popper. 2. In the upper left corner, you can select the RSS feeds you want to be synchronized to Outlook/Outlook Express. 3. In the upper right corner, you can select the type of feed you want to read. 4. In the upper left corner, you can switch between full page view and the normal view. 5. When you've finished reading, click RSS Popper, then Save changes. The next time you start Outlook/Outlook Express, all the news items from all the RSS feeds you've selected will appear in your Outlook RSS folders. \* \* \* NOTES RSS Popper synchronizes your RSS feeds to Outlook/Outlook Express and allows you to read RSS feeds offline using the offline view feature. \* \* \* 6. RSS Popper 1. In the upper right corner, click RSS Popper. 2. In the upper left corner, you can select the RSS feeds you want to be synchronized to Outlook/Outlook Express. 3. In the upper right corner, you can select the type of feed you want to read. 4. In the upper left corner, you can switch between full page view and the normal view. 5. When you've finished reading, click RSS Popper, then Save changes. The next time you start Outlook/Outlook Express, all the news items from all the RSS feeds you've selected will appear in your Outlook RSS folders. \* \* \* NOTES
