Simple, fast and straightforward web browser Incognito-Mode for browsing the Internet anonymously Search for any information on the web Some features missing Conclusion and performance Keymacro is a web browser that enables you to access the Internet in a very simple way, without having to invest any time in learning it. It does not offer an extensive list of options, but it does everything a web browser should. You have the capacity to create as many tabs as you want, and you can easily get to your favorite web pages without encountering any issues. You should be aware that you cannot view pages from within the Incognito-Mode, while you cannot search for information on the web either. Advantages: You can view web pages using different protocols You can control the number of tabs and how long each one will last You can add additional links to your favorites You can use an Incognito-Mode Disadvantages: There are no context menus when right-clicking on a website A few buttons do not work Conclusion and performance We found that Keymacro is an easy to use web browser, which offers a simple way of browsing the web. FINAL WORDS ABOUT SOFTWARE EXAMINATION DAO Web Browser is a software utility that enables users to browse the Internet by taking advantage of different advanced functions. Some of the most notable features are SpeedDial support and downloading shortcuts. This tool is based on the Adobe AIR platform and it is equipped with everything that you can find on any other internet browser. DAO Web Browser is one of the most stable tools for browsing the web, with a pretty decent performance, and it does not seem to have any issues with it. It is possible to use a very simple interface, if you prefer this kind of way of browsing the web, as it consists of an address bar, a menu bar and a pane in which to view web pages. It does not offer any advanced features, but it is quite straightforward, so that even novice users will not face any issues. The SpeedDial function helps you to save a number of web pages that you visit frequently and therefore, you can quickly access them in the future. To do that, just right-click on a URL, and select 'SpeedDial'. It is also possible to insert the current page URL to the SpeedDial pane, as well as having a search bar in it. It is also possible to save files, which is
