I also thought that even though I was not enjoying what I was playing, I was still pretty immersed in the game and its universe. The plot was fun and you do get to see some interesting stories and events come to light. The characters are all well written, and the game does give you the option to either play as them or not. You play as 17 year old Adriel Clemence who was once a monk, until he finds out that the world is not as it seems. You have some sweet time travel options at your disposal, and you get to pick whatever character you want to play as. The best part is that you get to control these characters, and make their choices for them. You get to make every decision for them, and you can go back and change them later if you want to. What I liked the most about Half Past Fate is that there is a lot of dialogue to be had in the game, and you have to learn the various languages to be able to understand what the characters are saying to you. Also, the artwork is beautiful, and this is something that a lot of games don't have. While there are a few glitches to be found, I found the game to be a really fun ride, and I am looking forward to seeing what the next chapter has to offer. Now if you'll excuse me, I need to go back to experiencing some time travel. 5:29 PM EST - Two 54b84cb42d
