iCloner is a nifty program that can quickly back up the files on your iPod device. This is highly recommended, in case the items are accidentally deleted or become corrupted. Description: iCloner is a nifty program that can quickly back up the files on your iPod device. This is highly recommended, in case the items are accidentally deleted or become corrupted. The app does not come with a setup pack, so iCloner is portable. It is suffice to simply extract the archive files to a user-defined directory on the hard drive, and run the executable file. As an alternative, you can store iCloner on a USB flash drive or similar storage unit, and run it on any computer. What's worth mentioning is that no leftover items can be found on the hard drive or in the Windows Registry after removing the program, thus minimizing the risk of system failure. Plus, you can keep iCloner in your pocket wherever you go. The interface of the tool is represented by a standard window with a well-organized layout. iCloner automatically detects all iPod devices that are plugged into the computer, so you only need to select one from the drop-down menu. After you select the output directory and filename, the backup is immediately created with the WHB format. Users with some experience in backup procedures may also pick the compression type. Restoring a backup file is seamlessly done, in a similar manner. The straightforward tool swiftly creates and restores a backup file, has a good response time and consumes a moderate quantity of CPU and system memory. We have not come across any issues throughout our tests, since iCloner did not freeze, crash or pop up error dialogs. Although the app's features are not particularly resourceful, novice users who quickly want to perform a backup operation on their iPod can easily work with iCloner. iCloner User Guide: Version 5.x 2,000+ users Status: Released Developer: iCloner, LLC The iCloner Program was started by John Welch in 2006. He got the idea to create an all-in-one tool, which backs up your iPod, and another one, that restores it, at the same time. iCloner requires no activation, no installation and no extra fees. The user does not have to configure anything on their computer, they simply run the executable. If they want to use the program, they don't need to change anything. Just plug in the iPod

ICloner

iCloner is an iPod backup program that works with any version of the iPod as long as its first two software revisions. iCloner is an easy-to-use and powerful backup tool that easily backs up your iPod. iCloner backs up your iPod in its default file system (in other words, on-device) with the WHB format. iCloner can also save your iPod to the Desktop and USB thumb drives. Once you have saved the backup to your iPod, you can open and restore files, play music, movies and other media. If you want to back up your videos on your iPad, then you can use a video player or video editor software. However, if you want to back up your photos, videos and other files on your iPad, then you may want to use a photo-file manager or an image viewer. In this review, we test and compare the Apple iPad photo app and apps that can back up photos. Using an app, such as iBackup, can be far simpler than doing the work manually. Some of the data is automatically imported to other programs, such as Windows Explorer. Furthermore, iBackup allows you to preview photos and videos as well as organize your files. This makes it an ideal option for backing up your photos. Like the main file manager, iBackup does not encrypt files or folders that you back up. It has a very intuitive interface that allows you to manage files and folders directly in iPad Explorer. The program is ideal if you want to back up your iPad data files. Screenshot (click to enlarge) iBackup includes backup options for photos, videos and contacts, in addition to the various files that are part of Apple's iCloud. It supports every iPad model, as well as the Apple TV and iPad Mini. iBackup is not available for the iPhone. There are other excellent backup apps for the iPad, such as iBackup and iPhoto Album, but iBackup has a few more features than the others. iBackup can back up multiple photos and videos at the same time, and it automatically uploads them to the cloud. The app allows you to create as many folders as you need, which simplifies the process of backing up your iPad data. Screenshot (click to enlarge) iBackup features a useful data browser, which is a helpful tool that allows you to preview files. Using the data browser, you can open and edit files and

PayPal Blog Top 10 Reasons You Need To Sell Your Ebook To PayPal What's the best way to start making money selling ebooks? Well, if you're like most people, it's probably to sell them to the company that's actually going to make you some of that money: PayPal. If you're looking to sell your ebooks on PayPal, here are the top 10 reasons why you should sell on PayPal. 1) PayPal Is The Best Place To Get Paid By Consumers I wrote an eBook about how to sell on Amazon, and a lot of people emailed me after they read it to ask how they could sell their eBooks on PayPal. Most of them weren't looking to sell on Amazon, and didn't know what Amazon was. People are going to start buying books directly from authors through Amazon. It's easier for them, and a lot of them are going to want to start selling their eBooks on Amazon, to see what it's like and start making some money. But Amazon takes a cut of every sale. And they keep a lot
