Mouse for Joystick Reviews Mouse for Joystick is a little application that turns your keyboard into a joypad for games. It has a few limitations, but it has a lot of 77a5ca646e

● 4.6.2 MB in size ● Mapped more than 2000 controllers ● Action for Mouse + Joystick ● Drag and Drop ability ● Support multiple profiles per controller ● Shift Button technology for fine tuning with multiple actions ● Configurable for many different game controllers ● Works with up to 64 button/stick controllers ● Robustness for Windows XP, Windows 7 & Windows 8 ● Advanced configuration panel ● User friendly interface ● Easy configuration ● Simple operation

The program is not free. It will cost you \$25, though, and you need to get it by purchasing Joystick 2 Mouse right from the official website at You will find it at the download section of the site. To buy it, you need to click on the button labeled “Order Now.” Once you have downloaded the software and installed it, you can begin configuring your joysticks. To do this, all you need to do is place your joysticks on the list and click on the “Add Joystick” button. You will be asked to set your joysticks’ profiles. You can do this by using the “New Profile” button. You will also be asked to assign an action to every button and axis. You can make this happen by using the “New Action” button. You can then save the profiles for future use. You can do this by using the “Save As...” button. You can then place your joysticks on the list and click on the “Add Joystick” button. You will need to repeat the process if you have more than four joysticks. This way, you can set different actions and profiles for your joysticks. As you begin to use Joystick 2 Mouse, you will be asked to load a profile. You can do this by clicking on the “Load Profile” button. You will then need to select the profile that you want to use. You can then place it on the list and click on the “Select” button. You can also drag and drop the profile from the list to the “Assign” panel. You can then choose the profile that you want to assign to your joystick by clicking on the “Assign” button. You will be asked to map the controller’s buttons. To do this, you can click on the “New Button”

What's New In?

Joystick 2 Mouse is a convenient yet versatile software that comes designed to help people with physical disabilities or those suffering from wrist pain caused by prolonged mouse utilization use all of the features of their joystick game controllers to control their computer system in a comfortable, effortless way. This quality program features mapping for each and every button on your joystick with the ability to control a mouse, a keyboard and even a computer system at the same time. It also supports up to sixteen game controllers at once, and custom profiles are totally user-defined with up to 30 different configuration options. Another cool aspect of the program is the Shift Button technology, a nifty setting that allows you to do more than one action per button, provided you configure the program with enough dexterity. Joystick 2 Mouse can be a wise tool for people with special needs, but it can also prove to be a wonderful alternative to the mouse in general. It is a handy and reliable program that comes ready-made for every joystick as long as it’s supported by the application. It’s set to become a part of your daily life with its advanced, yet easy to handle user interface. It’s time to learn how to control your computer system with a joystick game controller, but with Joystick 2 Mouse, you can do so without any extra effort and without a mouse.
