The most powerful KeyMapping utility ever developed. It offers a huge library of well-researched key mappings that is completely customizable. You can use KeyMappings to change letter combinations (for example, you may press Ctrl+N to make Rnapkin, for example) or you may change the keyboard layout completely (for example, you may press Shift+Ctrl+Alt to enter Caps Lock Mode). The KeyMappings can also modify the behavior of keys by simply holding down some keys and pressing a different key, for example, hold down Ctrl and then press Esc to release it. Language Switcher Description: Language Switcher is the easiest way to switch between all the locales of the Windows OS. It provides easy access to the languages installed on the system, and it allows to activate a specific one from a list of predefined languages. The program is very easy to use, so there are no instructions needed to start the tool, even if the user is new to Windows. It only requires a couple of clicks to activate the desired language, and it is available directly from the tray area, so it may be launched without needing to open the Windows Start menu. The program is very small and light, so it does not take up much space on the Windows desktop. Pick Up Current Version: (Language Switcher is a simple tool for easily changing the language that your computer system uses to type. You can use the program to change the language of the system keyboard, or the language of the menu of various applications or the editor used to write articles and essays. The program creates a shortcut in the taskbar area, near the system tray, which indicates the currently active language. When you click on it, the window shows you the list of all installed languages, so you can easily select the one that you need. The program also offers you the option of changing the language using hotkeys. This way you may use only the left hand to press the Windows key and the language keys, and the right hand to press Space to select the language you need. Another option is to use the Windows key + Alt to change the language, while pressing the Windows key + Tab to access the Window Switcher. These options help you to change the system settings without needing to perform complex actions. Language Switcher is a simple tool, but it may
