ArgoPDF

There is an official discussion thread: A CLI tool for the Arup SCARF system for the management of Arup SCARF reports. It is a port of the Arup SCARF Report Manager 1.0.5 (Win32) which can be downloaded here: ArgoPDF is a module for ArgoUML, which is an open source UML modelling tool. The aim of this module, is to provide a possibility of generating pdf reports of data contained in ArgoUML. This module is based on iText library. Give ArgoPDF a try to fully assess its capabilities! ArgoPDF Description: There is an official discussion thread: ArgoPDF is a module for ArgoUML, which is an open source UML modelling tool. The aim of this module, is to provide a possibility of generating pdf reports of data contained in ArgoUML. This module is based on iText library. Give ArgoPDF a try to fully assess its capabilities! ArgoPDF Description: There is an official discussion thread: This is a very fast, easy to use and free (As in no cost) PDF-Generator, it produces great looking PDFs from almost any document that can be handled by the iText library. You can also generate PDF files in a browser window directly from a URL. NOTE: The other version is broken and won't be updated as it is unmaintained, use the free version instead! PDF Creator - Free PDF to print and PDF writer. Generate various types of PDF files, for example: invoice, receipt, invoice forms, letter, statement, contracts, formal letters, training, conference, reports, flyers, shop documents and brochures. ArgoPDF is a module for ArgoUML, which is an open source UML modelling tool. The aim of this module, is to provide a possibility of generating pdf reports of data contained in ArgoUML. This module is based on iText library. Give ArgoPDF a try to fully

What's New In?

This document lists the current known problems with the functionality and usability of ArgoPDF. Known problems: * It is not possible to read ArgoPDF files if there is a custom security model or custom encryption. * It is not possible to force (display) a layout of certain models. * Acrofields are not displayed (unless you go through various fxns and code to achieve this). * The built-in security model is for the time being very limited. This means you cannot use ArgoPDF with very restrictive security models, such as using the built-in AMSM. The security model is currently available for design and deployment. You can however switch on or off security settings by clicking on the icon next to the view. * When exporting pdf to a non-adobe reader, the pdf export may not be entirely correct, or the text may be missing. Some pdf readers, such as adobe reader have problems with specific font files, such as Arial. Adobe reader will re-encode these fonts and try to read them as certain other font, such as Times New Roman. * Export of network diagram to pdf is not possible at the moment (even when all blocks of the model are selected). This may be a feature that will be added in future. * ArgoUML cannot be build in ArgoPDF, due to some dependency issues. This means ArgoPDF cannot be installed in the same directory as ArgoUML itself. * In some cases, ArgoPDF does not work with some of the views. * Currently (there are reasons for this), as soon as you close any of the ArgoPDF modules, that module is closed. Therefore you must "re-open" all the modules by hitting the + sign. (i.e. the fxns will be reset and all the content will be lost). The document is now closed, but the list of open modules is still available at the top of the screen. * Fonts in the text are missing, and ArgoPDF is not very good at detecting and choosing between different font files. * ArgoPDF exports just the initial part of the model. HISTORY This document is a consolidation of various documents related to ArgoPDF. * ArgoPDF - A pdf report generator for UML, DFD, ERD,... * ArgoPDF is a module to generate pdf reports for ArgoUML. * pdfReportArgoPDF is a pdf report generator for ArgoUML * pdfReportArgoPDF is available at * ArgoPDF runs on *nix systems, such as Linux or Mac OS. It also runs on windows (using Cygwin, though this is not tested at all). * ArgoPDF 1.0 - P

System Requirements:

* PC * OS: Windows XP/Vista/7/8/8.1/10 * CPU: Pentium III 800MHz/AMD Sempron 600MHz * RAM: 512MB (1GB if you experience audio sync problems) * DirectX: 9.0c * OpenGL: 3.0c * Video: DirectX 7.0c, DX10, DX11 * WVGA (800x480) * HD3000 * OSD2 * Sound:
